Re: Instructions for Peer-Reviewing

Thanks for volunteering to be a peer-reviewer for the *Journal of Physical Chemistry G*. Over the next few months I will be sending you several journal submissions for your review. Note that these submissions will be anonymous and you are required to keep that anonymity. We also ask that you read the ACS ethics policy for authors and reviewers found at <http://pubs.acs.org/ethics/ethics.pdf>. This policy may also help give you direction for your review.

After reading and reviewing the papers I send to you, please make comments in a separate document and send them to me electronically. Include the line number for each comment referencing the journal submission. I have already given you the submission (i.e., grading) rubric for lab reports. Please use that form as a basis for your review. Thoughtful and insightful comments on the results and discussion section will be especially useful, but the entire document needs to be reviewed.

Thanks again for your help in getting *J. Phys. Chem. G* up and running!
