

Note: Additional points are marked off for undiscovered (i.e., unreported) bugs.

____ 30 List manipulation using `filter` and `map`

____ 5 `movies-made-in-year`

____ 5 `movies-directed-by`

____ 5 `movies-with-actor`

____ 5 `titles-of-movies-satisfying`

____ 10 `movies-satisfying`

____ 10 Extend `matches?` to check for `_` wildcard. (Tests should return some `#t` and some `#f`)

____ 20 `substitutions-in-to-match`

-1 to -3 Included lots of unnecessary code which should only be in `matches?`

Bug: The base case returns `#t` rather than `'()`. Most of the other patterns won't work. Deduct 10 if bug is reported, 15 otherwise. A test which called `substitutions-in-to-match` directly should have helped you find this bug.

____ 5 (`equal? (car question) (car pattern)`)

____ 5 (`equal? (car pattern '...)`)

____ 5 (`list? (car pattern)`)

____ 5 (`equal? (car pattern '_)`) check that this matches *only* one word.

____ 25 `movie-p/a-list`

____ 5 (`who acted in ...`)

____ 10 (`what (movie movies) (was were) made (in before after since) _`)

____ 10 (`what (movie movies) (was were) made between _ and _`)

____ 10 testing – simple, direct, and complete

____ 5 spelling, grammar, sentence structure, `fixed-width font`, indentation
