

MCS-236 Homework 4

San Skulrattanakulchai

Fall 2012

Consider the following two relations defined on the set of Gustavus students:

1. The relation $x R y$ holds if student x is born in the same month as student y .
2. The relation $x R' y$ holds if students x and y are enrolled in some same course.

Is each of these relations an equivalence relation? Explain.
